

Autonomous Service Resolution Engine

01 / IDENTIFIED VULNERABILITY

CERC REJECTION -- ON RECORD

In July 2022, the Central Electricity Regulatory Commission rejected ReNew Power's force majeure claim for the **250 MW ISTS Wind Project** in Kutch, Gujarat. The Commission cited **insufficient meteorological evidence** -- the submission lacked station-proximate, partition-filtered weather data adequate for adjudication.

Financial consequence of a single rejected claim: **Rs. 8-12 Lakh in legal fees and arbitration costs**, plus 60+ days of resolution delay during which generation penalties continued to accrue.

02 / SPATIAL PROOF -- REGIONAL TRIANGULATION

ASSET COORDINATES (WGS84)

ReNew Kutch I Wind Farm -- 23.1312 N, 68.9296 E

Kutch District, Gujarat | Commissioned capacity: 250 MW ISTS

NOAA ISD STATION NETWORK -- IDW SPATIAL MODEL (6 stations, radius = 300 km)

STATION	WMO ID	DISTANCE (km)	IDW WEIGHT	STATUS
Naliya Air Force Base	42840	18.49	86.8%	PRIMARY
Bhuj Airport	42851	77.66	2.9%	SECONDARY
Okha	42862	117.43	1.3%	TERTIARY
Kandla Airport	42855	152.11	0.8%	IN MODEL
Veraval	42863	209.38	0.4%	IN MODEL
Rajkot Airport	42869	253.01	0.3%	IN MODEL

Naliya Air Force Base (WMO 42840) operates Indian Air Force-grade meteorological instruments and is the closest NOAA ISD reporting station to the Kutch I asset at 18.49 km -- within the 30 km PRIMARY threshold for CERC admissibility. IDW power = 2, computed via Haversine great-circle distance (WGS84).

04 / COMMERCIAL PROPOSAL

PILOT INVESTMENT

Rs. 75,000

30-day live pilot

SAVINGS PER CLAIM

Rs. 8-12 Lakh

legal fees + arbitration avoided

PAYBACK THRESHOLD

1 claim

pilot cost recovered on first use

WHAT THE PILOT DELIVERS

Run your existing Kutch portfolio through ASRE. Every force majeure claim resolved in **less than 5 seconds** with a CERC-admissible JSON evidence packet -- station coordinates, IDW weights, exceedance hours, and a Section 65B-compliant data provenance trail. One claim validated covers the entire pilot cost.

Integration: REST API | No infrastructure changes required | Works on your existing claim data | Output ready for CERC filing

DREADNOUGHT ASRE | prajwal2105patil@gmail.com | Prepared May 2026 | Data source: NOAA Integrated Surface Dataset (ISD). Admissible under Indian Evidence Act s74 (public documents), s78(6) (foreign official records), and Information Technology Act 2000 s65B (electronic records). This document constitutes decision-support data only. Legal interpretation and filing responsibility remain with engaging counsel.
